I am trying to print a check in Quickbooks but it is not giving me the options on how I would like that check printed. It is giving me the option to print directly from the Print checks screen to Print checks screen without the pop up box that asks how I want that check printed. Does this mean I need the driver reinstalled? If so, how do I go about doing that?

Wallace	I am trying to print a check in Quickbooks but it is not giving me the options on how I would like that check printed. It is giving me the option to print directly from the Print checks screen to Print checks screen without the pop up box that asks how I want that check printed. Does this mean I need the driver reinstalled? If so, how do I go about doing that?
