Anurag Sharma	Okay
	John, could you please confirm me your server name? Is it ForwardLLPOLD.myrealdata.net Or ForwardLLP.myrealdata.net
john	I own both - the current/active server is ForwardLLP.myrealdata.net
Anurag Sharma	Okay, thankyou for confirming.
john	well, I was unable to detect any change in the task that was running when the sessions froze, from the most-recent versic
	I'm running a similar task now to test once more - one more moment please
	by the way,
	I know that my server session "times out" after a period of inactivity
	however
	this "inactivity" is based on user interaction, whereas much of my work on this server is automation
	this creates a situation where the server will think I'm not present, and will shut down, even while the automations are rui
	is there a way to work around this limitation?
Anurag Sharma	Okay
john	(btw the second task completed successfully and the session is still active so I think we're in the clear for now)
Anurag Sharma	I understand your concern. As you mentioned that you are working on automated tasks, we can increase the inactivity log this change.
john	very good
	I will await notification of the completion f the changes in progress first to avoid any disruption

	thank you for the guidance, and also for your assistance just now
