

# How to backup ProSeries client data files?

**Meta Title:** How to Backup Proseries Client Data Files?

**Meta Description:** Learn how to securely backup ProSeries client data files. Safeguard your important tax data with reliable backup strategies. Protect your clients' information today!

In this article, we'll go through how to manually backup ProSeries data files. It is crucial to ensure the confidentiality and safety of your clients' tax information.

Learn how to backup ProSeries client data files by following the below steps:

Step 1: Launch ProSeries on the Ace Cloud server. Then use the Ctrl + click keyboard shortcut to select each client that has to be backed up.

Step 2: Click **File** in ProSeries to open the main menu after selecting each client for whom you need to backup.

Step 3: Hover your cursor over **Client File Maintenance** in the File drop-down menu, and then click **Copy/Backup Client Files**.

Step 4: Choose the target directory and save the data in your desired location.

Step 5: To start the backup, click **Backup client**.

Now, you have successfully set the backup of ProSeries client data files.

## Benefits:

Here're the 2 benefits of backing up ProSeries client data files:

- **Data Protection:** The security of priceless tax information is the main advantage of backing up ProSeries customer data files. You can protect client data from unanticipated incidents like hardware breakdowns, system crashes, and inadvertent deletion by regularly generating backups. Having a backup means that, in the case of data loss, you can quickly recover the data and limit interruptions to your tax preparation routine.
- **Business Continuity:** You can ensure business continuity even in the event of data loss or technological difficulties if you have trustworthy backups in place. You can immediately restore client data from backups in the event of a system crash or hardware breakdown and go on with your tax preparation tasks with little to no downtime. This reduces the possibility of delays, customer displeasure, or monetary loss as a result of data loss.

## Conclusion:

To get the most out of backing up ProSeries client data files, keep in mind that frequent scheduled backups, safe storage options, and periodic testing of data restoration procedures are all necessary.
